SUMMARY

I am a Full Stack Developer with 6 years of experience in digital project management and knowledge in JavaScript, HTML5, CSS3, and MERN stack (MongoDB, Express JS, React JS, and NodeJS).

PROJECTS

Curriculum Builder

🔗 https://curriculum-builder.netlify.app/

This application allows users to generate and save their CVs quickly and efficiently in a responsive website with beautiful UI/UX design

- Users can create a sign-up/login to their account.They can create their CV while seeing it in a preview, they can download the PDF and receive a confirmation email. They can create multiple CVs in their account.They can also delete and update them.
- This project gained the title of the best project in my class.
- Tech Stack: React JS, Node.JS, Express JS and Mongo DB. For styling, it is based on Tailwind CSS.

Board Games App

🔗 https://board-games-project.netlify.app/

Single Page Application for board games fanatics. Users can access detailed game descriptions and perform actions such as editing, deleting, and adding new games.

- Includes features like picking a random game, throwing a virtual dice, and conducting personalized tests to find the best-suited game.
- Tech Stack: React JS, JavaScript, HTML5, and CSS3 with Tailwind & Daisy UI.

Video game - Spitting Llama

🔗 https://isabelrobleda.github.io/project1-game/

In this game, players assume the role of a llama that automatically spits at appearing and disappearing targets.

- The project demonstrates my technical prowess in leveraging core web technologies to create an interactive and entertaining gaming experience.
- Tech Stack: JavaScript, HTML5, CSS3, and DOM Manipulation.

EXPERIENCE

Product Manager

IU International University

📅 02/2022 - 09/2023   📍 Berlin, Germany

- Led the end-to-end development and launch of 5 online EdTech digital products.
- Managed a cross-functional team and stakeholders ensuring seamless collaboration with designers, developers and the customer success team.
- Implemented Agile methodologies, overseeing the Kanban board, conducting unit testing (with Jest & Mocha), and engaging in user interviews.
- Produced and delivered data-led reports, showcasing a comprehensive understanding of project analytics, contributing to a 20% increase in sales for the organization (IU).
